PROJECTS

TalentSync AI:- [Live Demo](#)

04/26 – 15/26

- Developed an AI-powered interview preparation platform that generates personalized technical interview questions.
- Developed using React, Tailwind CSS, Node.js, Express.js, AI APIs.
- TalentSync-AI makes interview preparation smarter, faster, and more interactive using modern AI technology.
- Implemented real-time answer validation and performance analysis to help users improve interview readiness.
- Enabled users to practice personalized technical interviews with instant AI-generated feedback.

Interactive 3D Portfolio :- [Live Demo](#)

07/26 – 20/26

- Designed and developed a modern **interactive 3D portfolio** to showcase projects, technical skills, and professional experience with an immersive user experience.
- Integrated a **3D character model** using React Three Fiber and Three.js with real-time cursor-following interactions for enhanced engagement.
- Optimized 3D asset loading and rendering to ensure high performance and a seamless experience across desktop and mobile device.
- Deployed the portfolio on Vercel with GitHub integration for continuous deployment.

RaktSetu (Blood Donation Platform):- [Live Demo](#)

01/25 – 22/25

- Developed a platform that connects blood donors with recipients during emergency blood requirements.
- Developed using HTML, CSS, JavaScript, Node.js, Express.js.
- Simplified the process of finding blood donors and requesting blood through a centralized digital platform.
- Improved access to blood donation services by enabling users to find donors and submit blood requests online

HOBBY

- Playing Online Game.

- Watching Movie.

Language

- **English, Hindi**
